REVISION NEEDED

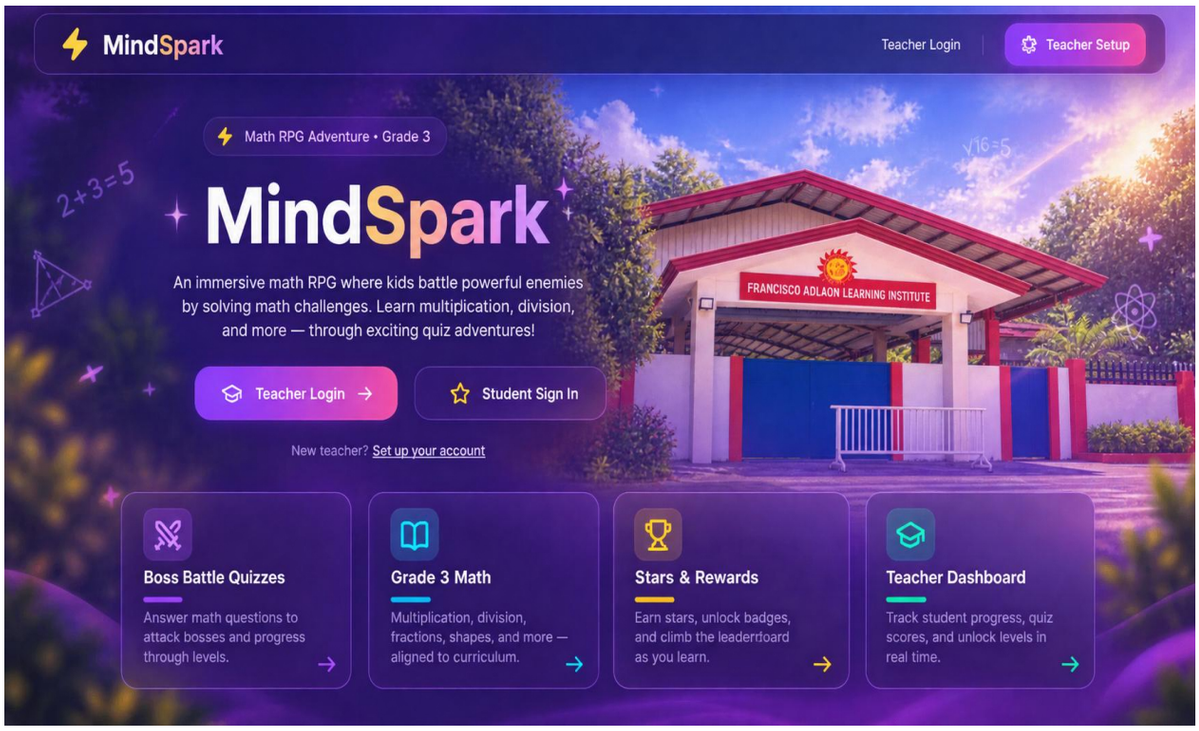

1. Remove the Grade 3 and change it into Grade 5.

2. For the landing page it should be only in Teacher's web not in student. This is the SUGGESTED DESIGN AND LAYOUT.

3. The first picture is the ideal and should be follow, but the second picture is the clearest example for color palette.

4. Providing the picture background

5. This is the color palette to be followed.

MindSpark Math color palette

Royal Blue - Main background, cards, and interface

#3459C7

Vibrant Purple - Buttons, highlights, and selected cards

#6255E8

Lavender - Glowing borders, secondary buttons, and accents

#9B83F5

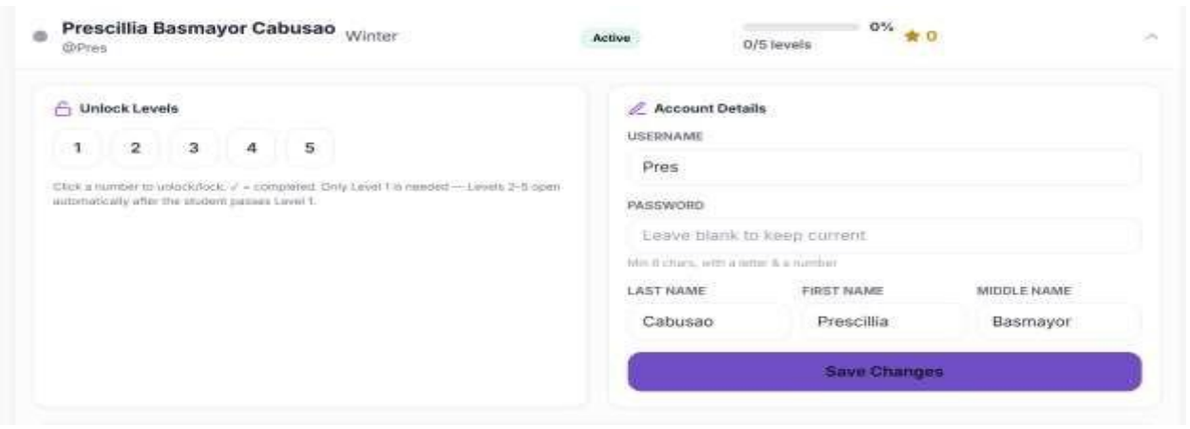

Soft Pink-Lavender - Magic effects stars, and soft glowing details

#D9B8FF

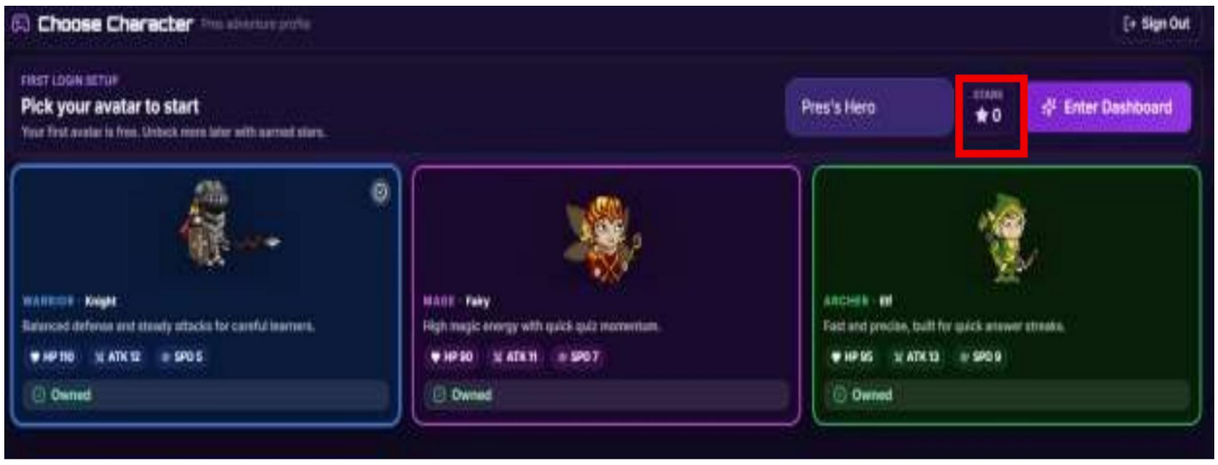

Soft White - Text, icons, and readable interface details

#F4F2FF

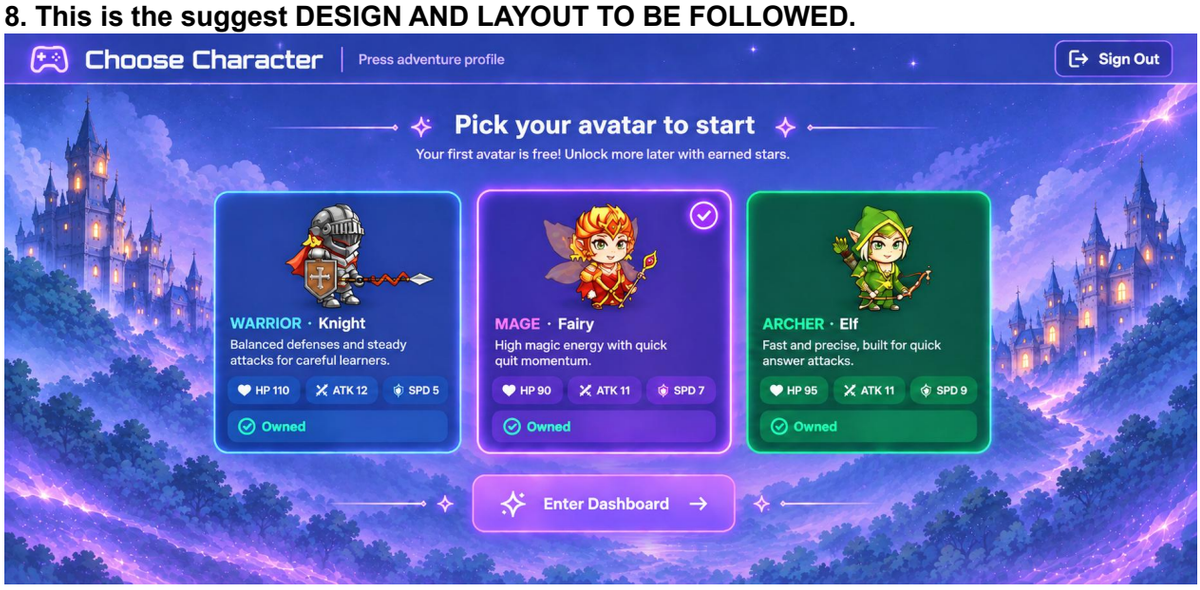

6. On the Account details, after e enroll ni teacher ang student only the Username ang makita wala ang given na password dapat makita sd basin maka limot ang students so naay copy ang teacher.

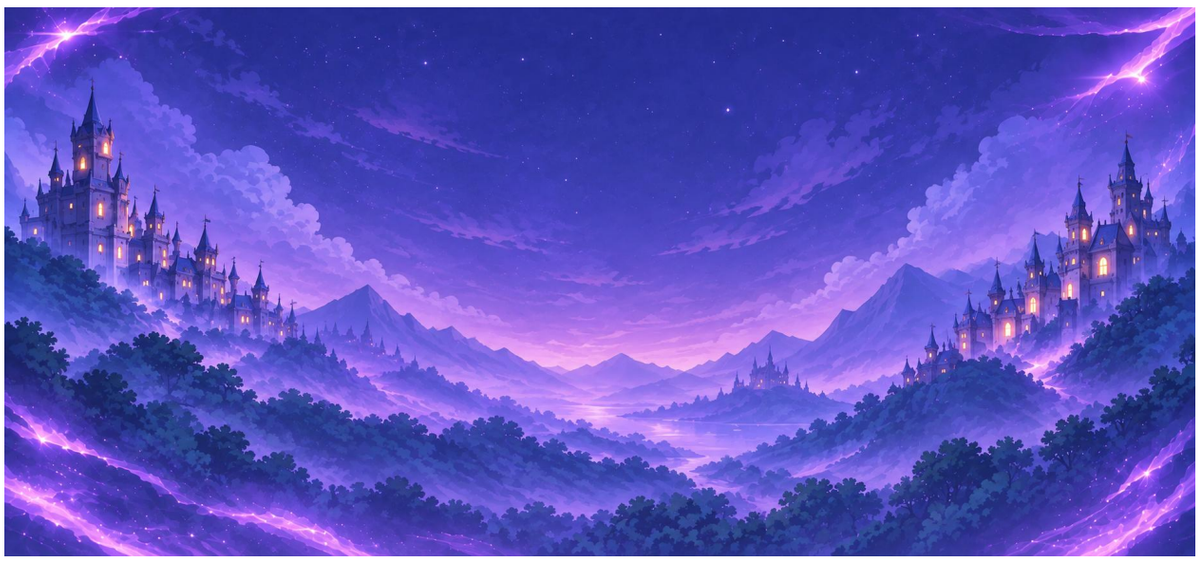

7. On the new account created, remove the star on the upper right side and dapat sa dashboard ra siya maisa.

8. This is the suggest DESIGN AND LAYOUT TO BE FOLLOWED.

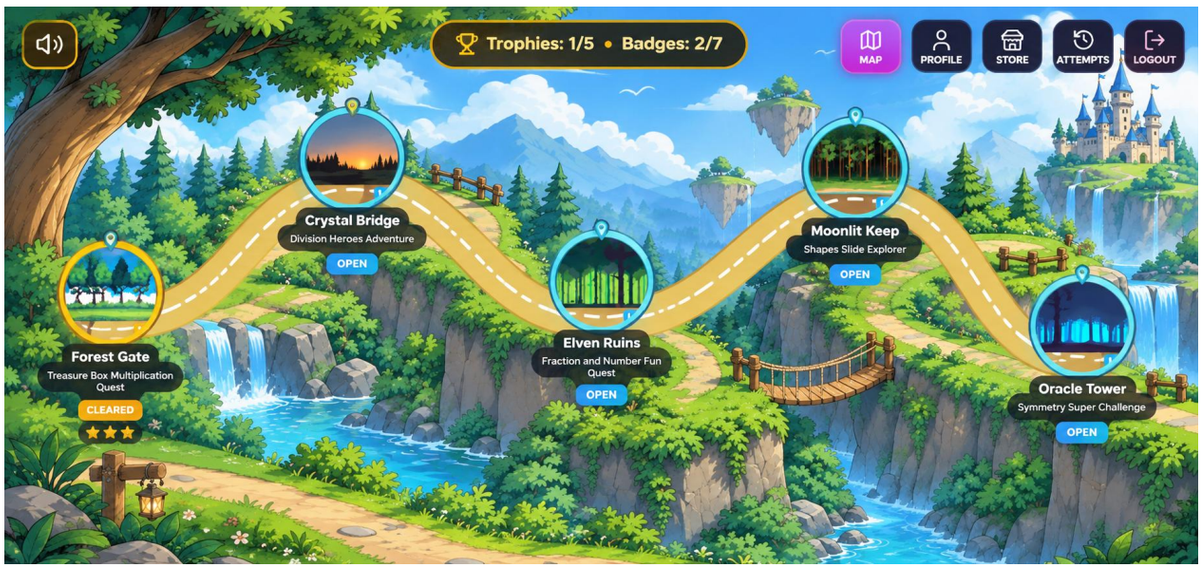

9. Provided you the background to be used.

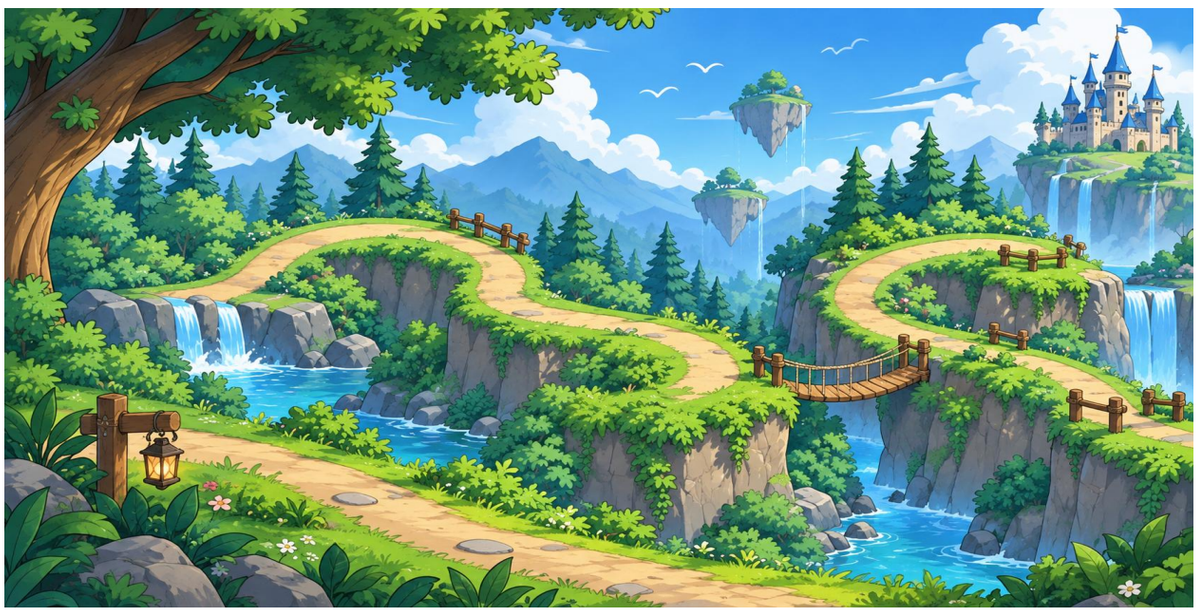

10. Can you revise the background design like this. This is the design prefer.

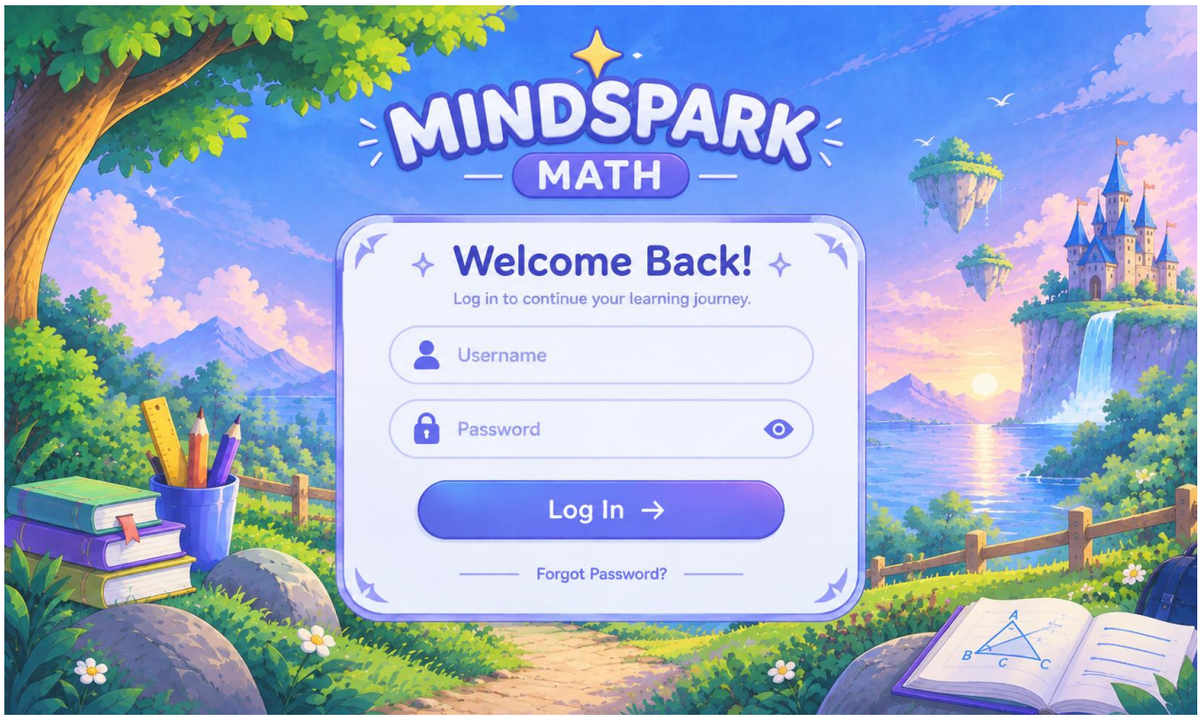

-DESIGN REVISE

11. Provided the picture

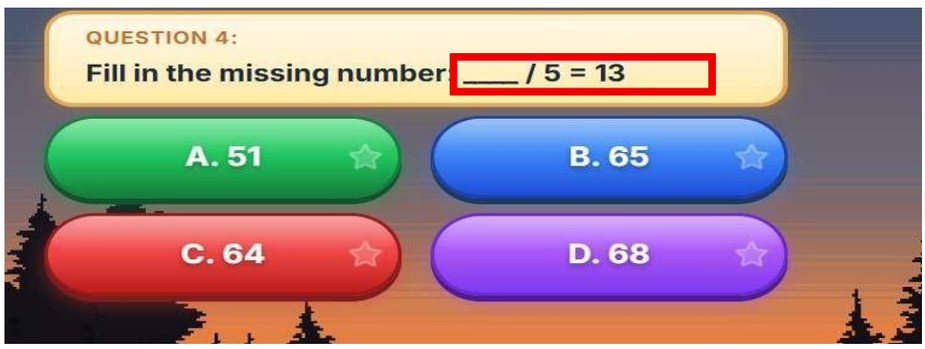

12. This should be the Log in page for the student. It must be separated with teacher

13. Providing you the background for student log-in

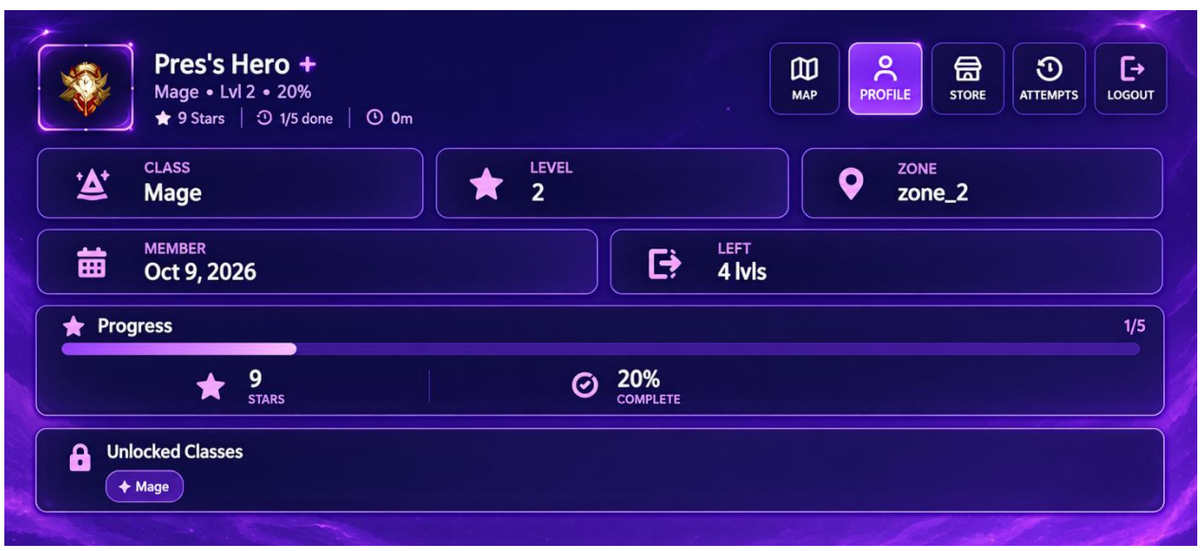

14. This is the question on level 2 I think, remove the underline word, or fill in the blanks question, the question should be word

15. When a student hit the badges condition, theres a pop up of badges but dile siya fix, mo pop up rasiya sa kilid. Please fix this and should be apply to all badges.

16. We remove the 0m playtime sir kay wala may time ang pag asnwer, then sa progress sa star and complete part pa arrange nlng sd ko sir. Then sa Pres Hero naa say Om remove it. The Profile, Store, Attempts, Logout should be the same backgound.

.....

CONCERN

1. Sir jull, pwede ko mangayo ug balik sa database/schema.sql sa system sir, kay naa mi presentation for appdev sir mag check sa system, pwede mi maka pangayo sa database sir

2, Add nalang napud nako sir, sa pag build nimo sa system sir what specific imo gipang gamit sir. Para ma download nako sir then maghinay2 sd ug practice sir. Kay para ma finalize sd nako ang System Architectecture sir.

Ex. 1. Web Dashboard for Teacher (Desktop View)
Next.js (React) with TypeScript, Tailwind CSS, and Framer Motion.

2. For ERD sir, pwede maka pangayo nlng sa imoha sir ug ERD kay naa man gud sa imo ang database sir.
